System Capacity & Care Load Analytics

Executive Summary Report

Generated: 2026-09-14 19:41:30

Overall System Status

Status: **HIGH**

Recommendation: Significant concern. Activate contingency plans and increase discharge processing capacity.

Key Performance Indicators

KPI	Value
Total Children Under Care	2484.0
Average Daily Intake	12.0
Average Daily Discharge	184.0
Average Length of Stay	6.0
Average Bed Occupancy	608.0
Net Intake	56.0
Care Load Variability	0.0
Backlog Accumulation	11.0
Discharge Efficiency	2.0
Average System Load	350.0

Healthcare Analytics Summary

Overall System Status: **HIGH**

Recommendation: Significant concern. Activate contingency plans and increase discharge processing capacity.

Warnings:

- Capacity stress detected

- Backlog increasing

- High net intake pressure

Key Analytics Results

Metric	Value
Capacity Stress Status	MODERATE_STRESS
Stress Days	140
Backlog Trend	INCREASING
Current Backlog	12232
Net Intake Trend	INCREASING
Growth Status	DECLINE
Total Growth %	-62.2%

Recommendations

Significant concern. Activate contingency plans and increase discharge processing capacity.

Specific Actions:

1. Increase discharge processing capacity and review placement procedures to reduce backlog accumulation.
